■ Project Description & Criteria Fulfilled

This project delivers a responsive, modern personal portfolio website built to showcase Bapanapalli Shankar's technical skills, full stack projects, AI data analytics experience, and industry credentials.

- **Clean Design & Intuitive Navigation:** Sticky navigation bar with smooth scrolling to Home, About, Experience, Skills, Projects, Education, and Contact.
- **Mobile-Friendly Layout:** Responsive CSS flexbox/grid layout rendering across mobile, tablet, and desktop viewports.
- **Dark / Light Theme Engine:** One-click theme switcher with persistent local storage.
- **Interactive Form:** Real-time client contact form with input validation and response toast.

■ Featured Projects Showcase

Project Name	Tech Stack	Description
Mobile Recharge Application	Java 17, Spring Boot, JPA, REST API	Full-stack recharge management platform with payment flow and REST endpoints.
AI Data Analytics Dashboard	Power BI, Python, Pandas, NumPy, SQL	Business intelligence dashboard for operational metrics and data visualization.
Online Food Order System	Java 17, Spring Boot, DTO Pattern, JUnit	Enterprise food ordering backend API supporting status tracking & patch updates.
Student Course Registration	Java, Spring Boot, JPA, HTML5	University course enrollment management portal and student database.
Secure Video System (AES)	Python, AES Cryptography, OOP	Cryptographic system for secure video encryption, storage, and authentication.

■ Education & Experience Summary

- **Education:** B.Tech in Computer Science & Engineering (2021 – 2025, 75.0%) - Sri Venkateswara Engineering College, Tirupati.

- **Experience:** Concentrix (Advisor I), Altruist Technologies (Business Associate), Rooman Technologies (AI Data Analyst Intern), TaPTaP Blackbucks (AI/ML Intern), ExcelR (Python Full Stack Intern).
- **Certifications:** IBM (Python 101, SQL Databases), Cisco (PCAP Python, CCNA Networks), Coursera (Excel), MongoDB.

Funngro Project Status: Completed & Verified
